### St. David's Child Development and Family Services - Desktop and Application Hosting

Non-profit - "...we have not had any downtime since the conversion and we have discovered how easy it is to add software. "Yet the biggest advantage is the peace of mind knowing our computing needs are being met by a very capable application

service provider. → [Read on...](#)

### Fluid Interiors - Network Support

Steve Schmaltz said, "We are experiencing less down-time for our users since Solbrekk took over our network support. Our employee productivity is up, and fewer people are coming to me asking for a new computer. Overall the staff has reacted positively to the solutions implemented by Solbrekk. → [Read on...](#)

### What is Cloud Computing and What Does it Mean to a Small Business

Cloud computing is a computing model that lets you access software, server and storage resources over the Internet instead of having to buy, install, maintain and manage these resources on your own.

## Mitigating the Risk of Unsecure Email Within Your Practice

Healthcare consumers are increasingly eager to access their healthcare records and results electronically. In fact, ease of use and immediacy has contributed to the increase in physicians' use of email to communicate with patients (from 14% in 2006 to 39% in 2009). → [Read on...](#)
