

Remote Bank Deposit - Checkmation SOAR®

Solbrekk is an authorized reseller of Checkmation's suite of products and services that support the conversion of checks and other payment instruments into images and accompanying data so that these items may be processed electronically. These remote deposit capture solutions comply with the 21st Century Act (Check 21), a federal law that supports the forward and return presentment of check images and data in lieu of the original items.

Checkmation features a fully configurable and user friendly CSV file for exporting into accounting programs, as well as fully configurable check images and metadata to export images directly into Laserfiche document imaging repository.

Why process your deposit remotely and electronically?

- **Convenient** - *Eliminate trips to the bank and it is faster, safer and easier*
- **Reduces Costs** - *Drastically reduces labor cost, eliminates transportation cost and eliminates cost associated with archiving physical checks*
- **Funds Availability** - *Enables better float management and may expedite funds availability*
- **Archived Retrieval** - *Provides convenient access to images*
- **Accuracy** - *IDs inconsistencies and vastly improves on clerical errors*
- **Security** - *Utilizes industry standards for maximum security of information*

I am confident that given the opportunity to present you with a business case for a Checkmation solution, you will be apt to adopt one or more of these great new products and services.

Here is how it works:

1. *Your business receives checks for payment*
2. *The checks and stubs are scanned*
3. *The check images and MICR data (the account and routing number) are captured*
4. *The data and image quality are verified*
5. *The image and data are transmitted to your bank to be deposited in your account*
6. *Your bank processes the deposits through the check clearing network or ACH (Automated Clearing House)*
7. *A CSV file is created and exported to your accounting program*
8. *The check image and MICR data are exported to your Laserfiche document imaging system*

The Checkmation SOAR® Process:
