

Solbrekk Professional Services

VMware vSphere Health Check

Overview

You've made a significant investment to virtualize your computing environment—let an expert help you get the most from your investment. Virtualization touches many aspects of your data center such as servers, networks and storage, and the organizations and processes that control them.

A Solbrekk VMware® Certified Professional consultant will work with your team to understand your unique environment and provide guidance on the current best practices for configuring and managing VMware vSphere™. Working together with your team, the consultant will review your VMware vSphere environment and provide concrete, actionable recommendations to optimize your virtual infrastructure.

Benefits

- Optimize VMware vSphere performance
- Maximize resources through efficiencies and roadmap for future improvements
- Mitigate risk by leveraging experienced consultants and proven best practices

Deliverables

- Collect data and conduct assessment of VMware vSphere (up to four ESX™ hosts)
- Identify potential opportunities to optimize configuration and improve performance
- Hold an interactive workshop to facilitate knowledge transfer on VMware vSphere best practice

Target Audience

Architects and administrators currently using VMware ESX and VMware vCenter who have three or more months of experience with VMware vSphere.

Key Activities

Action	Responsibility
