

Valued Customer – Basilica of Saint Mary

KJ You, Sr. Network Engineer and Tom Dibbell, IT Manager at Basilica of St. Mary

Bill Hafdal, Solbrekk VP of Sales and Marketing has been providing IT Network solutions, services and products to the Basilica of St. Mary for over 12 years.

The Basilica describes themselves as “a community rooted in the Gospel of Jesus Christ; committed to the spiritual growth and social well being of the city.” Though the Basilica building provides a landmark for the city of Minneapolis, it is through the work of their parish of activists and healers that makes them a true community landmark. Bill Hafdal and KJ You work closely with Tom Dibbell, to ensure that the church’s network is running efficiently in order to support all of the churches efforts. They run a combination of Novell and Microsoft networks, GroupWise for E-mail, Guinevere for e-mail filtering, and a WatchGuard Firewall.

Through the dedication and tenacity of the volunteers and the staff at the Basilica their commitment to community goes beyond the walls of the church. At the Basilica of Saint Mary, you will find comfort and guidance. Solbrekk is proud to have worked with them to assist them with their vision for success since 1991. Tom Dibbell is retiring this month. The Solbrekk team would like to wish Tom best wishes on his retirement.
